

Abstract

An apparatus (10) includes a switch assembly (12).
The switch assembly (12) includes a housing (16) and a set
of contacts (14) supported by the housing. The set of
5 contacts (14) includes a first contact (20) and a second
contact (40). The first contact (20) includes a first pad
portion (22) supported in the housing (16) and a first
connector portion (26) protruding from the housing. The
first connector portion (26) includes a compliant
10 connector (220). The second contact (40) includes a
second pad portion (42) supported in the housing (16) and
a second connector portion (54) protruding from the
housing. The second pad portion (42) is movable relative
to and is engageable with the first pad portion (22). The
15 second connector portion (54) includes a compliant
connector (220).
